Type b) are PDFs created by the webmaster such as this one.

Standard PDF file Naming Method used in guide2source.com is:
"sort code"-"Supplier"-"Catalog or Brochure Name with date or volume"-"Item Types"
example: 00022-RAF -RafRoundSpacers - Spacers.pdf
note: "sort code" helps to alphabetically arrange files in useful orders.
  Other example "sort codes" might be:
    00000 this file
    00123
    0089Z
Webmaster keeps <spaces> out of each "name field",
He uses Capitals and Lowercase to combine words into a particular "name field".
    example: for a "catalog Name" -RafRoundSpacers

The following 19 pages show how to use the site.
Red highlighted arrows with text show how various
