Two types of ‘Product’ files are displayed in “Catalogs” pages.
Type a) are text searchable full Catalog PDFs from a Supplier.
Type b) are PDFs created by the webmaster such as this one.

Standard PDF file Naming Method used in guide2source.com is:

"sort code"-"Supplier"-"Catalog or Brochure Name with date or volume"-"Item Types"

example: 00022-RAF -RafRoundSpacers - Spacers.pdf

note: "sort code" helps to alphabetically arrange files in useful orders.

Other example "sort codes" might be:

00000 this file

00123

0089Z

Webmaster keeps <spaces> out of each "name field",

He uses Capitals and Lowercase to combine words into a particular "name field".

example: for a "catalog Name" -RafRoundSpacers
